

my name is Kathy Foshay. If anyone was allowed to help me write letters it could rescue the Universe from the unnecessary TOTAL PLANETARY EXTINCTION the "top secret" system is actually bringing us to, but it keeps me like a ghost-prisoner in a communication vacuum, lifetime-used as a people-disappearance LURE-gimmick, so please be careful not to be conned.

No one will listen to my evidence that the 1962 real-life "French Connection" was a ritual to hide see-through "LSD" behind the white powder, which I suspect came from nuclearly pulverizing normal men and now anybody. The system claims I have schizophrenia, but that's really about the ax-murdering brain-chemical addicts everyone's afraid of. I think I could explain to this girl because her frame-up has a lot of parallels that could get her started to following all this and then she has the inner-energy to help translate and do the letter-writing, but the system-addicts, sic, squash all my communication attempts, do the Revelation's Armageddon-making this way. Gus the prisoner and these guys come from the system's #3 generational-slave type. 10%+ of future-profit if you get me a helper.
