Dear Psychology Department,
 American University,

My name is Kathy Foshay and I'm the most "invisibly" tortured person that's ever lived and I think I'm being moved to not far from American University and I'm going to try to reach you at the Psychology Dept. to try to get you to help me try to prevent the real-life end of the Earth and its human race.

From a mistake I made in 1989 the system's been saying that I have schizophrenia and from the library-book research I've been doing since stranded here in 2005 I've written hundreds of letters explaining that the global-system has Prehistoric-descended Autism-psychopathy with hallucinogen-dependence and now I've realized that everything was taken from Dr. Eugen Bleuler and twisted to this global-system's world's end. The photo is about the 1961-62 French Connection ritual.

Record book of 88 points of pure heroin is displayed by some of the arresting officers at the seizure in Tony Fara's basement (February 23, 1962). Tony (left) is held by Vincent Haskins; man in suit center, is Deputy Chief Inspector of N.Y. Narcotics Bureau Edward Carey; on his left, Sgt. Jack Fleming of Special Investigating Unit; Agents Frank Waters of the Federal Bureau of Narcotics, and NY narcotics agent Ben Fitzgerald.

I finally learned that Autism's Dr. Leo Kanner was actually Chaskel Leib "Leo" Kanner who'd moved here from Berlin in 1924'. I knew Dr. Bleuler had originated both the terms schizophrenia and Autism around 1911 but I couldn't figure Dr. Kanner's use of Autism till now I realize it was sabotage from Europe, from Berlin. Trying to explain this to others I wanted to find out who'd turned the term schizophrenia against normal-people Americans and all I've got so far from a few minutes on the Google is that Kurt Schneider took the term. Looking at the little picture of himself I'm thinking it's possible he could have been the progenitor of the late comedian Lenny Bruce, who I think had done most of the set up for the situation we're in, was peripatetic and conspiring everywhere toward this turning the world over to the underground's "split minds" of the ax-murderers Dr. Bleuler'd meant.

Eugen Bleuler invented the words schizophrenia and Autism and they got covered up.

The term schizophrenia was coined by Eugen Bleuler

Painting (mid-1800's) by Charles Muller; The Bettmann Archive

Humane treatment of people with mental illness gained importance in the late 1700's. This painting shows Philippe Pinel, a French physician of that period, pointing and demanding the removal of chains from inmates of a hospital for people with mental illness in Paris. Through Pinel's efforts, many hospitals introduced more humane treatment programs that included fresh air, exercise, and pleasant surroundings.

"Schizophreniegruppe," the 4 of them.

The "Autism" is probably short-code for Freud's auto eroticism and that they masturbate onto disembodied ovaries in order to grow their own offspring. Bleuler's term "ambivalence" was likely his way, living with them in Burgholzli, of trying to describe that they're violent. Please would you get anyone at American University to work with me. I've been all alone trying to explain this end of the planet for 10+ years as I'm really being used as a or the trick-LURE by which their Armageddon (Rev. 16:16, etc.,) is being sneak pulled-off. I have all kinds of different background-information on how this all developed but the system does everything to sabotage my efforts to reach any assistance. Kurt Schneider's like enslaved Priam on the next page.
